 - Have special criteria that must be met before returns are allowed. Triggers additional qualifying questions.
"Have you opened the package?"
 - Have specialty shipping criteria.
"We accept furniture returns, but do not pay return shipping for any reason."

Exception Categories

Exception categories are used to define special return processing certain groups of items. Store categories are generally the departments in your store. If you always have the same return policy for every item in your store, you do not need to create categories. If you do treat some items differently than others, you need categories.

For example, your store may accept return of any apparel merchandise, except opened packages of underwear. You would use categories to except opened underwear from your standard policy.
